

Climate Policy Quest Activity

Building a Low-Carbon Future: The Need for Collective Action

Learning Outcomes

By the end of this activity learners will:

- Explore the impacts of climate change in Canada and around the world.
- Discuss the predicted impacts under different temperature increase scenarios.

Length of Activity

1 – 1.5 hours

Materials List

Topic Backgrounder
Marking Rubric
Internet Enabled Device

Step 1

Begin by reading out the following text to your class:

A disconcerting outcome of the **climate crisis** is how it impacts different countries around the world. While the developed countries have historically contributed more to global greenhouse gases emissions, the developing countries bear the consequences as they are more prone to climate change impacts. This is because there are no boundaries in the atmosphere. Greenhouse gases are able to move freely across continents, in what we will refer to as “the global atmosphere.” This becomes an issue of the tragedy of the commons.

Step 2

Watch the following video to understand what a tragedy of the commons is and after watching the video discuss how climate change is a tragedy of the commons. **(5 minutes)**

1. Click on the link to watch the video: [Tragedy of the commons](#)

Step 3

Step 3: Learners will watch two videos on climate justice to understand how climate change impacts different countries. **(8 minutes)**

1. [How does climate change hit developing countries?](#)
2. [Who should pay to fix Climate Change?](#)

Step 4

Individually or in groups, complete the following activities: After watching the videos, learners will discuss amongst peers how climate change impacts different countries and share with class. **(10 minutes)**

- a. Learners will choose one of the countries identified in the video (choosing from either the high emitters group or the low emitters group) and research in detail the following **(45 minutes)**:
 - i. Research and report the range of negative effects that the country is facing due to climate change.
 - ii. Research and report the efforts employed by the government of the country in addressing climate change.
- d. Learners will make an individual journal entry reflecting on: "Climate Justice and where you think Canada stands in contributing to and addressing the global climate crisis?" Entry should be one page maximum. **(10 minutes)**
