

Program: Climate Policy Quest

Grade 10 – British Columbia Science Curriculum Connections

Activity Name	Organizing Idea	Learning Outcome
Activity: Evolution of Climate Science	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: Global Impacts of Climate Change	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: How is Climate Change Shaping the World?	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: Building a Low-Carbon Future: The Need for Collective Action	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: Exploring the Need for Climate Policy	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: Market Failures: What Role Can Policy Play in Building a Low-Carbon Future?	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: How Does Canada Contribute to Global GHG Emissions?	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: What Role Can Canada Play in Global Climate Actions	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: Climate Policy Options	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: What Makes a Good Climate Change Policy?	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: Climate Change Policy Simulator	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: Climate Change Policy and Indigenous Relations	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.

Activity: The Negative Externalities Game: Collective Action to Address Climate Change	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
Activity: Climate Justice in the Canadian Arctic	Government, Political Institutions and Ideologies, Environmental Policies, First Peoples Governance	Energy is conserved, and its transformation can affect living things and the environment.
