## **Program: Re-Energy**

## **Grade 4 – Ontario Science and Technology Curriculum Connections**

Activity Name	Organizing Idea	Learning Outcome
Activity: Renewable Energy Sources	Grade 7-12	
Activity: What is Renewable Energy?	<b>Grade 7-12</b>	
Activity: Build a Solar Car	A. Stem Skills and Connections	A1. STEM Investigation and Communication Skills – Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate health and safety procedures
		A3. Applications, Connections, and Contributions – Demonstrate an understanding of the practical applications of science and technology, and of contributions to science and technology from people with diverse lived experiences
	C. Matter and Energy: Light and Sound	C1. Relating Science and Technology to Our Changing World – Assess the impacts on society and the environment of technological innovations related to light and sound
	D. Structures and Mechanisms: Machines and Their Mechanisms	D1. Relating Science and Technology to Our Changing World – Evaluate the impacts of various machines and their mechanisms on society and the environment
Activity: Build a Solar Oven	A. Stem Skills and Connections	A1. STEM Investigation and Communication Skills – Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate health and safety procedures
		A3. Applications, Connections, and Contributions – Demonstrate an understanding of the practical applications of science and technology, and of contributions to science and technology from people with diverse lived experiences
	C. Matter and Energy: Light and Sound	C1. Relating Science and Technology to Our Changing World – Assess the impacts on society and the environment of technological innovations related to light and sound
	D. Structures and Mechanisms: Machines and Their Mechanisms	D2. Exploring and Understanding Concepts – Demonstrate an understanding of the basic principles and functions of machines and their mechanisms

A. Stem Skills and Connections  A. Stem Skills and engineering design process to conduct investigations, following approne health and safety procedures  A. Stem Skills and Connections  A. Stem Skills and Connections  A. Stem Skills and engineering design process to conduct investigations, following approne health and safety procedures  A. Stem Skills and Science and Connections  A. Stem Skills and engineering design process to conduct investigations, following approne health and safety procedures  A. Stem Skills and Connections  A. Stem Skills and engineering design process to conduct investigations, following approne health and safety procedures  A. Stem Skills and Connections  A. Stem Skills and engineering design process to conduct investigations, following approne health and safety procedures  A. Stem Skills and engineering design process to conduct investigations, following approne health and safety procedures  A. Stem Skills and Connections  A. Stem Skills and Connectio
Activity: Construire un Four Solaire  C. Matter and Energy: Light and Sound  D. Structures and Mechanisms: Machines and Their  Activity: Construire un Four Solaire  Activity: Construire un Four Solaire  C. Matter and Energy: Light and Sound  D. Structures and Mechanisms: Machines and Their  Activity: Construire un Four Solaire  C. Matter and Energy: Light and Sound  C. Matter and Energy: Light and Sound  C. Matter and Technology to Our Changing World – Assess the impacts on society and the environment of technological innovations related to light and sound sound sound the Energy of the Demonstrate an understanding of the basic principles and functions of machines and their mechanisms.  Demonstrate an understanding of the basic principles and functions of machines and their mechanisms.
D. Structures and Mechanisms: Machines and Their  Assess the impacts on society and the environment of technological innovations related to light and south and south and the environment of technological innovations related to light and south and south and the environment of technological innovations related to light and south and sout
Machines and Their    D2. Exploring and Understanding Concepts –
A. Stem Skills and Connections  Demonstrate an understanding of the practical applications of science and technology, and of contribut to science and technology from people with diverse lived experiences
Activity: Introduction to Solar Electricity  Activity: Introduction to Solar Electricity  Assess the impacts on society and the environment of technological innovations related to light and sou
C. Matter and Energy: Light and Sound  Cound  Cound
A. Stem Skills and Connections  Demonstrate an understanding of the practical applications of science and technology, and of contribut to science and technology from people with diverse lived experiences
Activity: Introduction to Solar Heat Energy  C. Matter and Energy: Light and Sound  C. Matter and Energy: Light and Sound  C. Matter and Energy: Light and Sound as forms of energy that have specific characteristics approperties
Activity: Solar Energy Transition with Six Nations of the  Activity: Solar Energy Transition with Six Nations of the  A. Stem Skills and Connections  A. Stem Skills and Connections behavior of the contributions of the c
C. Matter and Energy: Light and Sound  C1. Relating Science and Technology to Our Changing World –  Assess the impacts on society and the environment of technological innovations related to light and sou

Activity: Build an Electric Vehicle Model	A. Stem Skills and Connections	A1. STEM Investigation and Communication Skills – Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate health and safety procedures
		A3. Applications, Connections, and Contributions – Demonstrate an understanding of the practical applications of science and technology, and of contributions to science and technology from people with diverse lived experiences
	D. Structures and Mechanisms: Machines and Their Mechanisms	D1. Relating Science and Technology to Our Changing World – Evaluate the impacts of various machines and their mechanisms on society and the environment
		D2. Exploring and Understanding Concepts – Demonstrate an understanding of the basic principles and functions of machines and their mechanisms
Activity: Exploring Electric Vehicle Charging Stations	<b>Grade 7-12</b>	
Activity: History of the Electric Vehicle	<b>Grade 7-12</b>	
Activity: How is Your Community Adapting for Electric Vehicles?	<b>Grade 7-12</b>	
Activity: Planning a Trip in your Electric Vehicle	Grade 7-12	
Activity: Electric Vehicles and Charging Stations with Six Nations of the Grand River	A. Stem Skills and Connections	A3. Applications, Connections, and Contributions – Demonstrate an understanding of the practical applications of science and technology, and of contributions to science and technology from people with diverse lived experiences
	D. Structures and Mechanisms:	D1. Deletine Ceiene en en d'Engle en de Cour Changeine Maylel
	Machines and Their Mechanisms	D1. Relating Science and Technology to Our Changing World – Evaluate the impacts of various machines and their mechanisms on society and the environment
Activity: What EV Should You Buy?		
	Mechanisms	
Activity: What EV Should You Buy?  Activity: Build a Wind Turbine	Mechanisms  Grade 7-12	Evaluate the impacts of various machines and their mechanisms on society and the environment  A1. STEM Investigation and Communication Skills – Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate

	A. Stem Skills and Connections	A3. Applications, Connections, and Contributions –  Demonstrate an understanding of the practical applications of science and technology, and of contributions to science and technology from people with diverse lived experiences
Activity: Introduction to Wind Energy	D. Structures and Mechanisms:	D1. Relating Science and Technology to Our Changing World – Evaluate the impacts of various machines and their mechanisms on society and the environment
	Machines and Their Mechanisms	D2. Exploring and Understanding Concepts – Demonstrate an understanding of the basic principles and functions of machines and their mechanisms
	A. Stem Skills and Connections	A3. Applications, Connections, and Contributions – Demonstrate an understanding of the practical applications of science and technology, and of contributions to science and technology from people with diverse lived experiences
Activity: Wind Turbine Simulator	D. Structures and Mechanisms: Machines and Their Mechanisms	D2. Exploring and Understanding Concepts – Demonstrate an understanding of the basic principles and functions of machines and their mechanisms
	A. Stem Skills and Connections	A1. STEM Investigation and Communication Skills – Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate health and safety procedures
Activity: Build a Hydroelectric Generator  Activity: Introduction to Hydro Energy	D. Structures and Mechanisms: Machines and Their Mechanisms	D2. Exploring and Understanding Concepts – Demonstrate an understanding of the basic principles and functions of machines and their mechanisms
	A. Stem Skills and Connections	A1. STEM Investigation and Communication Skills – Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate health and safety procedures
	D. Structures and Mechanisms:	D1. Relating Science and Technology to Our Changing World – Evaluate the impacts of various machines and their mechanisms on society and the environment
	Machines and Their Mechanisms	D2. Exploring and Understanding Concepts – Demonstrate an understanding of the basic principles and functions of machines and their mechanisms
Activity: Pumped Hydro Storage	Grade 7-12	
Activity: Build a Biogas Generator	Grade 7-12	
Activity: Introduction to Biomass Energy	Grade 7-12	

Activity: Build a Flywheel Model	A. Stem Skills and Connections	A1. STEM Investigation and Communication Skills – Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate health and safety procedures
	D. Structures and Mechanisms: Machines and Their Mechanisms	D2. Exploring and Understanding Concepts – Demonstrate an understanding of the basic principles and functions of machines and their mechanisms
Activity: Build a Penny Battery	A. Stem Skills and Connections	A1. STEM Investigation and Communication Skills – Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate health and safety procedures
	D. Structures and Mechanisms: Machines and Their Mechanisms	D2. Exploring and Understanding Concepts – Demonstrate an understanding of the basic principles and functions of machines and their mechanisms
Activity: Endothermic and Exothermic Reactions	<b>Grade 7-12</b>	
Activity: Energy Storage Match	<b>Grade 7-12</b>	
Activity: Exploring Energy Storage in Your Community	<b>Grade 7-12</b>	
Activity: Exploring How to Make a Battery	Grade 7-12	
Activity: Heat Transfer Lab	Grade 7-12	
Activity: The Electrostatic Effect	Grade 7-12
